Employment

June 2025 – Current — **Faraday Future** — Gardena, California
Financial Analyst
- Collaborate in regular meetings with Finance, Accounting, and Legal departments to develop compliant and effective solutions for tracking fixed assets while minimizing debt, leading to higher leverage
- Develop comprehensive training documents detailing procedures for creating, changing, and deleting purchase requisitions and purchase orders in SAP, improving order proficiency across all departments
- Prepare and deliver presentations summarizing the key financial statements – Balance Sheet, Income Statement, and Statement of Cash Flows, providing high level financial updates for strategic planning
- Participate in cross-departmental discussions with Supply Chain and Manufacturing teams to review and validate purchase order activities, ensuring financial accuracy and alignment with company objectives
- Established and maintained SOX compliance methodologies by coordinating internal controls testing across departments, tracking audit requests, mitigating operational risk and reducing fraud exposure

Oct. 2022 – June 2025 — **Teledyne Controls** — El Segundo, California
Software Configuration Analyst
- Serve as the main contact point for physical media requests and direct software inquiries to the appropriate directories following company procedures decreasing request errors by multiple magnitudes
- Encourage and accelerate coherent and alternative methods of software distribution resulting in increased task management productivity and decreased risk of providing missing software packages
- Manage and deploy software and resolve software error reports under different departments using Jira and Confluence, and update and maintain software engineering and official releases using GitHub
- Strengthen the software configuration management team's procedures for software distributions, builds, and releases by communicating effectively and cooperating with customers and departments, preventing software backlogs and expediting the rates at which builds, releases, and distributions occur.

July 2021– September 2022 — **SVL Investment** — Placentia, California
Financial Analyst
- Integrated efficient analysis models using Value Line Investment Analyzer and SPSS Statistics to predict stock values from different industries, ensuring maximum profit from stock buying and trading
- Utilized Quickbooks to record and maintain company assets and liabilities including cash, accounts payable and receivable, and stock trading, reducing potential for losses from trade outcomes
- Implement practical and informative chart and graphical visualizations of client finance portfolios using Tableau, Microsoft Excel, and MySQL to obtain company data for optimal for stock trading strategies

Sept. 2018 – June 2021 — **UCR Information Technology Solutions** — Riverside, California
Tech Lead
- Utilize Jira's help desk ticketing system to effectively manage and resolve hardware and software related issues, reducing potential productivity delays and spending, resulting in optimal client satisfaction
- Deploy Okta as MDM and desktop service to the mobile devices and computers of over 1000 students for seamless MFA operations and instruct trainees on Okta's basic user identification functionality
- Maintain Linux, Mac OS, and Windows systems to prevent the possibility of viruses or malware spreading across a network of hundreds of systems, and ensuring access only to authorized users
